Summary

Cybersecurity background with a growing focus on responsible AI, technology governance, and the risks that emerge when new technologies are introduced into organizations. Interested in practical research that helps organizations, particularly nonprofits and humanitarian actors, adopt technology safely and effectively.

Education

Purdue University | West Lafayette, IN *Aug 2026*

Bachelor of Science in Cybersecurity, Magna Cum Laude, Chancellor's List, GPA: 3.95

Relevant coursework: Ethical hacking, Digital forensics, Network security, Ethical hacking,

Northern Virginia Community College | Alexandria, VA *Dec 2025*

Associate of Applied Science in Cybersecurity, Magna Cum laude, Dean's list, Presidential honoree, GPA: 3.59

Certifications

AI Security by Infosec, CompTIA Security+, U.S. FBI: Countering DPRK-Linked IT Worker Fraud and Cyber-Enabled Threats, Google Cybersecurity Certificate**,** Microsoft Azure AD Secure Access, uCertify Networking with Microsoft Technologies, CISSP (*in progress*), IELTS band 8

Experience

Tavan Bogd Tech | Information Security Administrator *Jan 2026 – Sep 2026*

- Perform security risk assessments, gap analysis, and develop security hardening policies across 17 enterprise entities spanning banking, healthcare, automotive, food service, technology, and other industries, with a focus on ISO 27001 and applicable regulatory security requirements
- Supported international vendor selection initiatives by managing communications and maintaining relationships with external partners
- Manage security log inventories and centralized security monitoring through Splunk Enterprise SIEM, supporting security visibility, event analysis, and incident investigation
- Developed security awareness training and onboarding materials focused on acceptable use of AI in enterprise environment and preventing sophisticated AI phishing attacks
- Streamlined SOC operations by implementing AI-assisted workflows across Splunk, Microsoft, and Trend Micro for security analysis and selected response processes

Mastercard | lab simulation *Oct 2025*

- Uncovered security gaps within the marketing department, compiling a detailed risk assessment and presenting targeted remediation strategies to reduce overall threat exposure

Leadership & Activities

Career Project | Nova Hacks *Feb 2025 – May 2025*

Project Initiator

- Designed and developed a peer mentorship website for college students, empowering users to connect through shared experiences and career goals
- Independently built both the front-end interface and back-end functionality, integrating interactive mentor profiles and animated user engagement features

Skills

Programming & Analysis: Python (novice), Linux, Vulnerability Assessment, Incident Response
Security Tools: Splunk SIEM, Autopsy, Nmap, Wireshark, Jump Server, TrendMicro
Frameworks & Protocols: ISO27001, NIST Framework, ZTNA, IAM, MITRE ATT&CK
Cloud & Identity: Azure AD, AWS, Microsoft 365
